The 29th Annual General Meeting For the Session 2013/2014 Agenda

Date: 9 June 2014 (Monday)

Time: 6:15p.m.

Venue: Diamond Ballroom Hall, Basement I, Eaton Hong Kong,
380 Nathan Road, Kowloon

1. To receive and confirm the Minutes of the 28th AGM.
2. To receive and adopt the Annual Report of the HKIE-YMC for 2013/2014 Session.
3. To receive and adopt the Financial Statement of the HKIE-YMC for 2013/2014 Session.
4. To elect the Chairman and Committee Members of the HKIE-YMC for 2014/2015 Session.
5. Any Other Business.

**THE HONG KONG INSTITUTION OF ENGINEERS
YOUNG MEMBERS COMMITTEE**
*Minutes of the 28th Annual General Meeting
for the Session 2012/2013*

Date : 7 June 2013 (Friday)
Time : 18:40 to 19:10
Venue : Assembly Hall, YMCA, Tsim Sha Tsui
Present : More than 60 members attended

The Chairman welcomed all participants to the Twenty Eighth Annual General Meeting of the Young Members Committee (YMC).

1. The minutes of the Twenty Seventh Annual General Meeting was confirmed and endorsed.

Proposer: Ir Arlene LO Second: Ir Leo CHAN

2. The Chairman delivered the Annual Report for the session 2012/2013, which was subsequently endorsed.

Proposer: Ir Venice HUNG Second: Ms Candy FUNG

3. The Treasurer presented the Financial Report for the session 2012/2013, which was subsequently endorsed.

Proposer: Ir Arlene LO Second: Mr Jerry CHAU

4. Ir CHAN On Yi, Annie was nominated by the Committee to be the Chairman for the session 2012/2013 and was subsequently elected without objection.

Proposer: Ir Leo CHAN Second: Ms Candy FUNG

5. The following members were nominated in the election of Committee Members for the session 2013/2014.

Name	Discipline	Organisation
Mr CHEN Hao Ting (Proposer : Ir Annie CHAN)	Mechanical Second : Dr. Ernest TSANG)	EPD, HKSARG

Ms CHEUNG Ching Chi (Proposer : Ir Annie CHAN)	Mechanical Second : Ir Leo CHAN)	Hong Kong Productivity Council
--	--	---------------------------------------

Ms CHEUNG Yuen Man (Proposer : Ir Annie CHAN)	Electrical Second : Ir Iman LAI)	CLP Power HK Ltd.
---	--	--------------------------

Mr HO Ka Chun (Proposer : Ir Iman LAI)	Mechanical Second : Ir Annie CHAN)	The Hong Kong Electric Co. Ltd.
--	--	--

Ms KO Yik Yan (Proposer : Mr Jerry CHAU)	Electrical Second : Ir Kit CHAN)	CLP Power HK Ltd.
--	--	--------------------------

Mr LEUNG Chi To
(Proposer : Ir Leo CHAN)

Electrical **DSD, HKSARG**
Second : Ir Iman LAI)

Mr LEUNG Kwai Yeung
(Proposer : Mr LIN Chi Kit)

Civil **Leighton Contractors (Asia) Ltd.**
Second : Ms Alice TSE)

Ms Emily YU Hay Ting
(Proposer : Ir Annie CHAN)

Geotechnical **Atkins China Ltd.**
Second : Mr Ambrose CHEN)

Total No. of Nomination : 8

No. of Vacancy of Committee Members for Session 2013/14 : 7

Scrutineers for the vote counting of Committee Member were:

- Ir Arlene LO, Past Chairman of YMC
- Ir Iman LAI, Immediate Past Chairman of YMC

The 7 newly elected committee members for Session 2013/2014 are:

- Mr CHEN Hao Ting
- Ms CHEUNG Ching Chi
- Ms CHEUNG Yuen Man
- Mr HO Ka Chun
- Ms KO Yik Yan
- Mr LEUNG Chi To
- Ms Emily YU Hay Ting

6. A.O.B

The Chairman expressed sincere gratitude for the support and contribution of all committee members and helpers in the Session.

Ir Annie CHAN proposed a vote of thanks for the outgoing Chairman, Ir Iman LAI, for her leadership in the Session.

There being no other business, the meeting adjourned at 7:10 p.m.

Recorded by:

Ir Ryan CHAK
Honorary Secretary (2012/2013)
The HKIE-YMC
28th AGM
7 June 2013

Message from Chairman

Introduction

The HKIE-YMC was established in 1985 and its vision throughout is to serve the need of young members and nurture young engineers to become future leaders in the engineering industry, the society and the international. With over five thousand Registered Young Members (RYMs) from 21 engineering disciplines, the HKIE-YMC stands alone as one of the most prominent young engineers' bodies in Hong Kong.

To facilitate the young engineers in tackling the various challenges in the work place and the daily life as well as caring the community, we organized a series of events with the theme "Engineer a Better Community; We Learn and We Share" in this session. With advices from past chairmen, leadership from committee members, co-opted members and event-coordinators and efforts from helpers, we have fulfilled the three goals namely Professional Development, Personal Enrichment, and Community Engagement under the theme.

Professional Development

As a learned society, we continued to organize series of technical seminars and visits to broaden members' knowledge by bringing different professionals to present at quality events. We also increased members' exposure in the international arena by organizing overseas delegation and mainland delegation. We organized an Overseas Delegation to New Zealand and Mainland Delegation to Shandong. Moreover, we hosted various events for young engineering organizations from overseas when they visited Hong Kong.

Personal Enrichment

In addition to technical competence, we encouraged members' personal development by organizing various work-life balance programme from soft skills to leisure events. Under this goal, we organized Golden Life Series including numbers of events by non-technical programmes group, sports and recreation group and social culture & arts group.

Community Engagement

To spread the positive image of the engineering profession in the public, young engineers play an important role. After "Learning" engineering knowledge and soft skills, we "Share" it to our community. We organized various community services such as mentorship programme to help the underprivileged, elderly visits and activity with the ethnic minority group.

With the help and support from the HKIE, the HKIE-YMC took an active role in providing guidance to the eight student chapters. We also held membership and career talks, visits, and leadership training camp for engineering students so as to provide them with an opportunity to learn more about the industry.

Representatives in Various Committees and Divisions

Apart from organizing activities for our members, we have also taken an active role in various standing committees of the HKIE. Representatives from the HKIE-YMC attended meetings held by the Council, Learned Society Board, Planning Committee, Community Service Committee, Continuing Professional Development Committee, Public Relations Committee, Safety Specialist Committee and nineteen divisions of the HKIE. Through our representatives, we have established strong relationships with the HKIE.

It is another fruitful year for the HKIE-YMC. We have organized a variety of activities from all aspects with excellent quality and met the needs of our members. I would like to express my sincere thanks and appreciation to our Adviser, Ir Joseph KH CHOI, Co-opted Members from Council, Ir CF LAM and Ir Eva YW MAK, Immediate Past Chairman, Ir Iman WM LAI, our Committee Members, Co-opted Members, Event Coordinators, Observers and Helpers for their support and contribution in this Session.

When this booklet is published, we have almost come to the end of this session and the HKIE-YMC 30th Anniversary is about to begin. We will continue to serve our young members by organizing events with variety and quality.

4.1 STUDENTS PROMOTION GROUP

By Coordinators - Ms Yani KO Yik Yan and Ms Regina CHEUNG Yi Nga

From year to year, the Students Promotion Group (SPG) continued to assist students on their career prospects in Engineering and to provide support to the eight Student Chapters (SCs) in organizing different activities.

During this session, SPG kept a close relationship with students in order to understand their needs and to help them in their career development as well as personal development. Series of skills enhancement workshops about time management, presentation skill and job hunting and the two-day leadership training camp (pictured to the right), were organized to provide all-rounded development for students to enhance their competitiveness in our society.

young engineers from YMC to share their valuable experiences with students, we truly hoped that these seminars could initiate forward thinking of students toward the engineering industry so as to equip students to tackle future challenges.

With the efforts of the eight SCs and full support from the YMC, the Engineers' Night was successfully held in February this year. Not only did the students had formed friendships with young engineers at this wonderful night, students also gained better understanding about our profession.

In the coming year, SPG will continue to act as the linkage between YMC and SCs to broaden students' horizons in the engineering profession and enhance their sense of belonging in the HKIE.

Last but not least, we would like to express our sincere appreciation to our helpers and all parties helping us. Thank you very much. Let's pass it on and build a better future with our future engineers!

Membership and career talks were organized in every tertiary institution to promote the HKIE and served as a platform for students to understand their future career path. Two career-oriented seminars about working in mainland China and the fast-blooming mobile app industry were also organised. By inviting both senior members from the HKIE and

4.2 GRADUATES PROMOTION GROUP

By Coordinator - Ms Serene CHEUNG Yuen Man

With the objective to assist our graduate members to develop towards their profession, Graduates Promotion Group (GPG) has organized a series of seminars and workshops for our graduate members.

Continuing the tradition, we continued to hold the "Young or Ready Series" with various divisions in the HKIE for our graduate members to tackle their professional assessment. This session, GPG jointly organized the captioned series with Environmental Division, Electrical Division, Civil Division, Building Services Division and Structural Division etc. The speakers introduced the routes to become a professional engineer and shared their valuable working experience with our graduate members. Our members have benefited a lot from the seminars and have become well prepared for their professional assessment.

In addition, GPG has organized three workshops on image building, public speaking skills and professional writing skills. These workshops aimed at

enhancing our graduate members' soft skills, not only for their professional assessment but throughout their career life. The workshops attracted many graduate members to attend and all of the participants were impressed with what they have learnt from the workshops.

Last but not least, I would like to express my gratitude to my beloved helpers for all your support throughout the session, making GPG a great success. Moreover, the continuous support from all the graduate members is crucial to the success of every activity. I look forward to meeting you in future events!

4.3 SEMINARS GROUP

By Coordinators - Ms Candy FUNG Man Yui and Mr Raymond MAK Ka Yeung

Engineers contributed to a well-developed community which serves us. As the latter, young engineers were honored to take this responsibility. Under the backdrop of "Engineer a better community; we learn and we share", our dream was visualized.

To achieve our common goals, youngsters shall arm themselves with cross-discipline knowledge. Technical seminars offered them the fundamental knowledge to attain comprehensive perception to their expertise. Four series were introduced in this session. The first series titled on "Thrive for future" to lead the success through former experience. Seminars Group invited several professional speakers from various disciplines to share their prospects for the future of industries from the course of history. 3D printing technology, transportation development and geographic information system applications were cited as few of the remarkable seminars.

However, engineering a better community was not an easy task, the increasing social challenges were pressing the industry, in particular, matters related to our environment and planet earth. In this regard, a batch of "Environmental series" provided young members a present situation and steps to next decade. Clearly, one of the obstacles on building environmental friendly business is the social and economy justice.

In consideration of the issue on waste management in Hong Kong was stressed recently, in respect of the environmental issues. Seminars Group invited the Hong Kong Waste Management Association (HKWMA), The Institution of Mechanical Engineers Hong Kong Branch (IMechE HK Branch) and Environmental Division of the HKIE to jointly organize a series of seminars to give an overview on waste treatment and handling to engineers.

Despite the environmental aspect, safety is another serious concern. Engineers have been working hard on design for safety, whichever the business. Fire engineering approach and; the recent hot topic, the aviation safety, were the examples. Apart from lives, properties were protected by engineers as well. Security on cyber-world was a gradual challenge to public, engineers fight for it.

Seminars Group is gratefully devoted to assist young members on assimilating the professional knowledge and facing the social challenges. Hope you enjoyed and enhanced your skills throughout these seminars. Last but not least, we would like to take this opportunity to express our sincere thanks to our helpers and all parties helping us. Let's build the future for the better~!

4.4 VISITS GROUP

By Coordinators - Mr Eric HO Ka Chun and Ms June YIP King Yan

Being one of the most fruitful groups in bringing technical visits to our members in the Session 2013/14, Visits Group (VG) targeted to echo the global trend of sustainable development, transportation hub, as well as some hot topics like severe weather and fuel mix.

On sustainable development, we had our fingers on the pulse of the city. We drew comparison on how the EcoPark and the Chemical Waste Treatment Centre took initiatives in treating various wastes and utilizing resources. Innovation against environmental problems formed a key part in our topics of study. We brought the members to visit the District Cooling System at Kai Tak Development Area which is the engineering contribution to higher energy efficiency behind the cruise hub. Besides, we held a visit to the Holiday Inn Express Hong Kong SoHo which features various green awards like US LEED, HK BEAM Plus and so on.

An excellent transportation network would be a pre-requisite in developing and reinforcing Hong Kong as a hub among the Asian cities. On land, we visited the MTRC Operation Control Centre which participants could have a feel on how the Transit System handles massive numbers of passengers every day. Over the sky we found ourselves at the New Civil Aviation Department Headquarters, while we went to the Hongkong United Dockyard to have a closer look at our marine transportation. What's more, the newly opened Kai Tak Cruise Terminal has been visited as well.

Severe weather is one of the threats to us. Recalled a heavy storm with hails which struck Hong Kong, together with failure in drainage system which flooded a big shopping mall in Hong Kong, we realized drainage and piping would be a hot topic for visits. We brought our young members to visit the Lai Chi Kok Drainage Tunnel as well as Sewage Interception Scheme in Kowloon City. Furthermore, a Water Mains Rehabilitation Project has been touched upon.

Another hot issue would be fuel mix which every one of us is involved with. We took initiative to bring our young members to CLP Black Point Power Station, Lamma Winds which is the unique commercial wind turbine currently in Hong Kong, Town Island where plenty of solar panels were installed, as well as CLP Nuclear Resources Centre where members could know more on this debatable source of energy. We hope our members could have a glimpse of various sources of electricity.

The occasion of a group of engineering students from Nanyang Technical University, Singapore visiting Hong Kong enriched the series of events for VG. Playing host to the foreign visitors, VG arranged a visit to MTR XRL Contract 823B (Shek Kong Stabling Sidings and ERS).

In this session, we organised a total of 17 visits that ranged from active construction sites to power plants and to public works plants. Our visits covered multi-disciplinary projects that satisfied the need of our members from different engineering backgrounds. Without the generous support from different parties on the visits, VG couldn't have brought the events to success. VG would like to express gratitude towards the host companies, organizations, office bearers, fellow VG helpers and other helping hands from the Committee for assisting the working group in creating a rewarding year.

4.5 NON-TECHNICAL PROGRAMME GROUP

By Coordinator - Ir Jenny LAU Ching Ling

In the session 2013/2014, Non-technical Programme Group (NPG) has organized different activities including, personal development, managerial aspects, communication skills and so on. We organized different seminars and workshops for the members so as to enhance their knowledge not limited to engineering, but also on other important skills required in our daily life.

This year, continuing the success of last year, NPG has organized the following non-technical activities to our members, including Aromatherapy Application and Stress Relieve Workshop, Seminar on Basic Changes Required to Implement NEC, Vegetarian Italian Cooking Workshop, Master of Ceremonies (MC) Training Workshop. Young members could acquire non-technical skills and knowledge in different aspects, but also widen their horizon and make friends with other young engineers from different fields.

The Golden Life Series was organized this year to enrich our young members on non-engineering aspects, such that their life will be fulfilled and complete. NPG has organized Vegetarian Diet –

Advantages and Tips and Eat Smart – How to manage your diet? to enrich our members knowledge on healthy diet. NPG has also organized a seminar on Personal Financial Management to share with our members basic knowledge on financial planning and management. To share with our members how to build up a good relationship with others, the Workshop on How to Tackle Conflict and Build up a Good Relationship was successfully organized. Through the Golden Life Series, we hope our members could achieve work-life balance with both mentally and physically healthy.

The NPG events were organized successfully with great efforts made by all helpers and support from our members. Many young members expressed their interest and enjoyed the non-technical activities a lot. We have also received lots of positive feedbacks from our participants. In the coming session, NPG would continue organizing more interesting non-technical activities to all our members. Last but not the least, it is my honor to have an excellent team in this Session and I would like to express my heartfelt thanks and gratitude to our helpers for their contributions.

4.6 COMMUNITY SERVICES GROUP

By Coordinators - Ms Gigi CHEUNG Ching Chi and Ir Alan CHENG Siu Lun

During Session 2013/14, Community Services Group (CSG) has continued to provide different opportunities for our young members to serve the society. Various kinds of community services have been organized in this session.

Organized by Po Leung Kok, CSG joined a one-year YMC volunteer Programme for visits to the Elderly in need during traditional Chinese Festivals, such as Chinese Winter Solstice, Lunar New Year and Dragon Boat Festival, to show our love and care to them. Also, an elderly home cleaning organized with The Salvation Army before Lunar New Year and visit to homeless people provide a half-day volunteer visit to share our love among this city.

To let members learn more skills for carrying out visits, workshop on volunteer services soft skills was organized and attracted members to join the programme. Members were also learned from visual impairment during Dialogue in the Dark Workshop which encouraged members to adopt positive mindset when facing uncertainties and challenges.

Besides the volunteer programme, performance training of juggling was organized for member to build up confidence in front of people and gain a sense of humor. The participants

performed what they learned during Joint-Society Mother's Day party for underprivileged children.

YMC formed teams to join 10km challenge in Sowers Action Challenging 12 Hours 2013 which aims to help students in China getting out of poverty through education. Our team also joined International Coastal Cleanup 2013 engage members to remove trash and debris from beaches which can change the behavioral patterns that contribute to pollution.

Finally, we would like to thanks all the helpers and participants to support a remarkable session in serving the community for CSG. We will organize more interesting and meaningful events for our members.

4.7 SPORTS AND RECREATION GROUP

By Coordinator - Ms Emily YU Hay Ting

Sports and Recreation Group (SRG) had a very busy and productive year! With the theme of the "Golden Life Series", SRG organized a wide range of activities to allow our young members to explore and learn new things to benefit their physical and mental health.

We took advantage of the last rays of sunshine and warm weather as the summer drew to a close in September to hit the water in our Snorkeling and Marine Conservation event. Our coach taught us how we can help preserve the fragile coral home of more than one million diverse aquatic species, and took us snorkeling to say hello to the various types of marine life.

During the winter, we moved our activities indoors. The Team Building War Game event emphasized the importance of teamwork when accomplishing a task under pressure, and members practiced critical thinking and effective communication.

Indoor Rock Climbing, K-Pop Dance, Yoga, and Archery challenged our young members physically and mentally. Even though most members were trying the activities for the first time, they tackled the challenge fearlessly and came out smiling and laughing. Our members showed each other great support, and formed many new friendships.

As spring returned, our members got intimate with the earth and learned about the benefits of organic farming and foods at our Organic Green Thumb event, jointly organized with CPDC. They also learned to make (and eat!) various organic foods.

During the Green Carnival 2014 co-organized with the Green Council, we shared our knowledge of green living with the general public and supported Hong Kong's primary and secondary school students for the annual Model Competition through mousetrap car races. We also showcased our teamwork as "Team YMC" in two sports days with great results!

Besides our official events, casual get-togethers were organized to bring our committee, helpers, and members closer together through our Fitness Club. Thanks to the enthusiasm and hard work of SRG's helpers, the participation from our young members was outstanding. We will continue to organize interesting and fun activities to develop our athleticism and improve our health!

4.8 SOCIAL, CULTURE & ARTS GROUP

By Coordinator - Mr Ambrose CHEN Hao Ting

In this session of the Social, Culture and Arts Group (SCAG), we aims to provide our young members with a more inspiring experience in terms of social culture and sense of art.

The "Lomography Workshop-Capturing the City Delights" has provided our young members a whole new experience in photography. Different from traditional photography,

Lomography requires better sense of art; and through this workshop, not only our members had fun with the film photography, but they also experienced and grew a sense in art.

Local memories and cultural heritage in the city had become a hot topic in recent years. SCAG therefore organized a "Secret tour – Know More about the Old Days". Through this secret tour, our members had experience the not-the-same Sheung Wan District as known to them. Not only the history of Sheung Wan and early development of Hong Kong has been taught, but the participants also learnt the social culture and the changes of culture within the district.

Despite the fact that the Middle East is now in a very politically tense region, it is a very important region in terms of religion, as the major three religions, Judaism, Christianity and Islam regard the region as "Holyland". Therefore, SCAG also organized a seminar "Holyland Unmasked". The speaker shared his experience during his visit to the Holyland. The participants not only learnt the architecture, geography and history of the Jerusalem region, but also experienced the religious side of the region.

SCAG would like to hereby take the liberty to thanks the hard work by the helpers to make these events happened, and would promise to provide more interesting and inspiring events to our young members in the future.

4.9 PUBLIC RELATIONS GROUP

By Coordinator - Ir Venice HUNG Chun Leung

During Session 2013/14, Public Relations Group (RPG) organized a number of activities to members in order to broaden their social networks and understanding. In addition, PRG establishes connection to newly formed Learned Societies like Young Group of Engineers Australia Hong Kong Chapter (EAHK). Through organizing joint events with other professional institutions, the linkage between the HKIE and other professional institutions is further enhanced.

One of the large scaled joint events was Joint Society Christmas Party 2013. The party was jointly organized by the YMC and other young professional groups including AES-YES, ASHRAE-YMC, ICE HKA G&S, ICES-YES, IET-YMS and IMechE-YMS. There were over 160 participants dressed up to the theme "Party in the Heaven". With some light background music and a couple of drinks, participants were able to warm up themselves shortly after their arrival and mingle with young members from different disciplines in a relaxed environment.

As mentioned in the above, there was a joint event organized with EAHK Young Group on 23 Nov 2013. It was comprised with hiking and barbeque. Around 15 participants went hiking to Wilson Trail, passing through Ping Fung Shan, Wong Leng, Lai Pek Shan and Pat Sin Leng. It was not an easy task to female members, but all could complete the whole hiking path within 5 hours. Barbeque was a reward to hiking participants with some other members. It was a fun day to all participants and allowing members to know new friends from other professional institutions.

Apart from joint events with other professional institutions, a Public Relations Skills Workshop for Young Engineers was organized on 17 Feb 2014. The workshop was aimed at giving an opportunity for young engineers to learn more about the Public Relations skills and tools, such as communication skills, research skills, writing skills, international mindset and creativity. We were honoured to invite Ms Jenny Tam, the chairperson of the Steering Committee of Hong Kong Public Relations Professionals' Association as the speaker for the workshop. The workshop involved introduction of recent changing environment for different stakeholders in the society, speaker's sharing on her past experiences and a role play exercise. It was very fruitful and participants gained a lot.

Other than the above, YMC also participated and supported different events organized by other professional institutions. For example, Tour of Revitalisation Project at Mallory Street organized by HKIP YPG on 5 Aug 2013 and Halloween Party organized by HKIA YMG on 8 Nov 2013. Without the support of group helpers and members' participation, the events could not have been held successfully.

4.10 PUBLICITY AND WEBMASTER GROUP

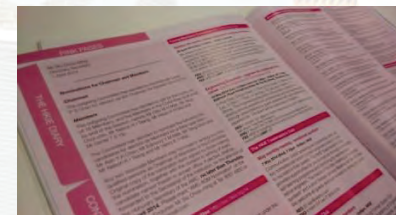

By Coordinators - Ms Lorna LI Tin Wai and Mr Franco CHAN Chun Ting

In the session, the theme is "Engineer a Better Community; We Learn and We Share". In response to the theme, we achieved by holding various kinds of hundreds of events, from indoor to outdoor, from local to overseas. The activities are categorized into three main areas: 1) Professional Development 2) Personal Enrichment 3) Community Engagement. YMC encourages our young members to broaden themselves by exposure to different aspects apart from their professions.

From the traditional to non-traditional, we continuously provide information through publication on the HKIE journals, Hong Kong Engineer; and the HKIE eNewsletters etc. This is the traditional means of publicity.

Everyone of YMC members should familiarize with HKIE YMC webpage (<http://ymc.hkie.org.hk/>). By simply, some CLICK-CLICK, you can easily get the update of various events held by YMC. More than just be informative, you must be excited with the enrollment function. Each member can register anywhere with internet services using your home computer, laptop or even your mobile phone. This is the non-traditional means.

Sharing the joy and experience, this is not slogan. This is what you are practicing in your everyday of life. To make sure those members who are not able to join the

events being updated, we are sharing joyful experience of some of the events through publication of activity reports in the HKIE journal, YMC website and also YMC Facebook. Why not "LIKE" our page by now!

Apart from the event promotion and activity reports, we also have chairman message, committee corner, publications for annual reports, delegation report etc. in the webpage.

Besides that, we also encourage members to submit activity reports after each events, those reports will be published in the HKIE journal or post in our website to share what they have learnt and interesting experience they get after each events.

Date	Event Type	Events
04/05/2014	Community Service	Joint Society Sports Party for Children (Jointly organized by HKIE and ASCE 2014)
05/05/2014	Visit	Visit to the Tai Chi Centre (Traditional)
06/05/2014	Seminar	Seminar on Resident Charges & Tenants' Expenses in Safety Engineering (Co-organized by HKIE and ASCE)
10/05/2014	Seminar	Engineers' Association - Engineers & Life Challenges as a Career

09/06/2014	Special	The HKIE YMC Institutes Committee 2013/2014

4.11 SPECIAL EVENTS GROUP

By Coordinators - Ir TANG Whai Tak and Ir Vincent TAM Wing Yeung

The Special Events Group (SEG) was created in this Session. This was part of the restructuring of the YMC to improve its service in bringing a more diverse range of large scale activities to all young members. This aim was achieved through collaboration with various committees/divisions of the HKIE and other professional bodies.

Many young engineers have been looking for ways to contribute in building a better society. We, together with 18 other professional organisations, arranged a 3-day delegation to Macau and Zhuhai in October 2013, as well as a dialogue session with the Chief Executive of the HKSAR, Mr CY Leung, on 29 March 2014. These events gave our members a first-hand understanding of the workings behind the fast emerging markets in the Pearl River Delta and provided them the unique chance to channel their ideas to the top officials.

For graduates who were new to the profession, we built on last year's success and co-organised the second Engineering Exposition with the HKIE Venere Club on 10 May 2014. In addition, we supported the HKIE headquarters in holding Graduate Engineer Day in June 2014. At both events, leading figures of our industry generously shared their experiences, which inspired our new blood of what successful engineers could achieve in their careers.

The third group of our target was secondary school students. We saw it as our responsibility to nurture our future engineers and to explore their potentials. We joint force with the IET, IMechE and IIE in hosting the Future Engineers Project. This interactive fun day was filled with talks and games on the theme of "railway". Not only did we successfully promote Engineering to the public, we also got the students to appreciate the engineer's role in delivering a reliable and efficient railway network.

These events were just the beginning. With the resources and the support of the HKIE-YMC, we are certain that the Special Events Group will continue to bring many more new activities to our members.

4.12 HUMAN RESOURCES GROUP

By Coordinator - Ms TAM Ka Yan

Young Members Committee is always a big family for young members of different disciplines and provides a platform to share experience.

This year, Human Resources Group (HRG) has successfully organised the helper recruitment exercise 2013/2014 and subsequently allocated helpers into the working groups they preferred. Human Resources Group has kept on injecting new blood to and strengthening the bonding between young members and Young Members Committee.

On behalf of Young Members Committee, may I take this token of thanks to all our helpers for their precious effort and continual support to our big family "Young Members Committee". Hope you all enjoy joining our activities and do not hesitate to invite more of your friends to join us. See you soon in the coming events!

YMC OVERSEAS DELEGATION 2014 TO NEW ZEALAND - Perfection in Synergy of Nature & Technology (March 28 - April 6, 2014)

By Ir Vincent LEUNG Chi To

Since 1991, the Young Members Committee (YMC) of the Hong Kong Institution of Engineers (HKIE) has organized delegations to various parts of the world, ranging from Australia, Dubai, Denmark, the UK, Canada to Germany. These delegations arouse young engineers' potential in leadership and motivate their vision to learn from overseas good practices. This year, the HKIE-YMC jointly organized a delegation to New Zealand from 28 March 2014 to 6 April 2014 with the HKIE-CPDC. It is our honour to have 9 distinguished senior members from the HKIE as our advisors to support us. One of the advisors, Ir Raymond Chan, the President of the HKIE joined the delegation trip with 16 young engineers from different backgrounds.

With the theme "Perfection in Synergy of Nature and Technology", we focused on three main study areas: Utilization of Natural Resources, Being connected with Efficient Network (Transportation) and Facing the Natural Challenges. New Zealand is a country with a very close relationship between nature and technology. With the success in taking the balance between development and environment protection, New Zealand cities generally rank highly on international livability measures. During our visit in Auckland and Christchurch, we explored the latest developments and technologies in the three mentioned study areas.

In addition to the technical seminars and visits, we had exchange meetings as well as social gathering with The Institution of Professional Engineers New Zealand, University of Auckland and University of Canterbury.

In preparation of the trip, we arranged a series of local seminars and visits related to the delegation theme to enrich knowledge of delegates and Registered Young Members. Each delegate also carried out local research and review on the latest development of the renewable energy, transportation and technologies dealing with natural challenges. After the delegation, delegates would publish a report and organize a debriefing sharing the findings from the delegation in June 2014.

Last but not least, we would like to express our sincere thanks to our advisors, sponsors, hosting organizations and delegates for their support and contribution to this delegation.

山東省工程文化考察團

由鄧懷德工程師撰寫

香港工程師學會青年會員事務委員會於2014年4月18日至23日率領了一行24人的代表團到我國山東省濟南市及青島市進行6天的考察。這是委員會繼2008年第六次往國內考察。

行程的第一站是濟南市。有「泉城」美譽的濟南作為中國第二人口大省及經濟第三強省的省會，把握著山東省的高速發展，並按照「十二五」城市總體規劃要求，加快開拓市內新城區。我們在了解東部新區的未來佈局理念和策略之同時，亦到過山東建築大學參觀了一系列舊建築物以平移方法整幢搬遷的項目，見識到當局對保育的認真。行程中，我們發現山東省內有不少地方善用當地充分的陽光，在屋頂上配置了太陽能熱水器及在高樓商品房的外牆上安裝了太陽能板。

考察團第二個目的地是青島市。因青島跟香港一樣同為海邊城市，所以考察隊伍特意到了多個與香港興建中項目相似的考察點，如全球最長跨海大橋的膠州灣大橋、高鐵專用的青島北站和國家級樞紐港的董家口港，令團員們對各個領域有更深入的了解。我們亦參觀了由清華大學設計，集節能、生態、環保及新能源於一體的科研開發場所——天人生態大廈。我們還與營運者在一些環保議題上交換了意見。

除了工程學上的交流外，是次考察同樣地注重文化的體驗。我們遊覽了歷代皇帝封禪之地、五嶽獨尊的泰山，登上玉皇頂親身體會「一覽眾山小」的意境。被乾隆帝封為「天下第一泉」的趵突泉亦是讓人欣賞自然奇觀的必到之地。而到了青島，更少不了邊吃鮮甜美味的海產，邊品嚐醇厚柔和的百年國際老牌青島啤酒！

本次考察得以圓滿成功，承蒙中聯辦、中國科協、山東省科協、濟南市科協及青島市科協各個機構的鼎力支持。團友們全情投入的參與，令整個活動更加精彩及獲益良多。

HKIE-YMC MENTORSHIP SCHEME

By Coordinator - Ir Alan CHENG Siu Lun

As we had a successful mentorship scheme with the Boys' & Girls' Clubs Association of Hong Kong (BGCA) in past few years, YMC has continuously launched the mentorship scheme with the support from BGCA. In this event "HKIE-YMC Mentorship Scheme 2013/2014", one-year 1-1 mentorship services have been provided by 20 selected young engineers to young students aged from 10 to 16 from disadvantaged background. Each participating child (mentee) will be assigned with a volunteer personal mentor.

Mentors will help the children draw up and implement their personal development plans, and share their life experience with the children. On the other hand, all the mentors would be provided by the HKIE-YMC and BGCA different training programmes, which cover topics such as self-awareness, personal development and financial management, etc., to help participating children formulate and implement their personal development plans.

The focus for this year of the personal development plan is looking for their dream. Base on "REMAP", participating children can find their way for future. REMAP stand for R-Resources, E-Experience, M-Motivation, A-Ability and P-Personality. Mentors share these five basic intangible assets among other mentors and children to help them achieve their goals in this plan.

The programme is started from end of 2013. A workshop organized by BGCA in November to let social workers to match up each mentors with mentees. A one-day camp was organized for mentors to have the first time meeting with mentees in January. By different games in the camp, mentors could build up friendship with mentees. Mentors reviewed the experience in one-day camp during the workshop in February and prepared the one-day visit to Chinese University of Hong Kong (CUHK) in March. The mentors and mentees from all groups met for a kick-off event for this programme in April to build up a long term friendship during the scheme.

THE HKIE JOINT INSTITUTES INNOVATION COMPETITION

By Ms Regina CHEUNG Yi Nga and Mr Ivan LEE

The Joint Institutes Competition is one of the highlights in the HKIE Hi-Tech Fiesta 2014. The theme of the competition this year is 'High Gear for New Technology, a Mindset for Change'. The competition aims to provide opportunities for students to apply their engineering knowledge from academic theory to practice, increase students' awareness of the society and encourage them to conceive improvement for the community using their engineering expertise as well as creativity.

In this competition, contestants were allowed to choose any topic related to a current problem in the society. The contestants then developed innovative ideas and solutions from an engineering perspective to improve quality of living through innovation with high technology.

The competition is divided into two stages. 13 teams from 8 Student Chapters joined the Heat Competition by submitting a report and delivering a presentation in front of a panel of judges in February 2014. Students demonstrated their extraordinary creativity and their understanding of the problem chosen with preliminary innovative solutions.

7 finalists have been shortlisted to take part in the Final Competition in the form of the one-day public exhibition in the HKIE Hi-Tech Fiesta 2014 on Sunday 8 June 2014 at the Hong Kong International Trade & Exhibition Centre in Kowloon Bay. Each team will present their innovative solutions in front of the judges. In addition to the assessment by the judges for the Gold, Silver, Bronze Awards and Merits, there will be a separate award for 'My Favourite Project' judged by voting by the general public on the day of the Hi-Tech Fiesta. The public will be able to appreciate the creativity and innovation by the younger generation of engineers.

We would like to express our sincere thanks to the helpers and students chapters for making this event possible. We are particularly indebted to the judges who spend their invaluable time in assessing the reports and presentations, and giving the contestants comments on how the proposed solutions can be further developed.

JOINT YOUNG PROFESSIONAL GROUP

By Coordinators - Ms Serene CHEUNG Yuen Man, Ms Candy FUNG Man Yui and Mr Raymond MAK Ka Yeung

We are eager to provide a platform for our young members in widening their horizon. One of the ways is by expanding their network. Joint Young Professional Group (JYPG) links up young groups from 6 societies including, the Chartered Institute of Arbitrators (CI Arb), the Chartered Institution of Building Services Engineers (CIBSE), the Institution of Civil Engineers (ICE), the Hong Kong Institution of Surveyors (the HKIS), the Law Society of Hong Kong (the HKLS) and the HKIE and organizes several events including social gatherings, diversified courses, community services and the One Day Seminar. We have strengthened the connection with peer institutions.

One of the biggest events held by JYPG is the "One Day Seminar on Contract Management", which has been successfully held for 9 years, attracting more than 250 young members from all six institutions each year. Continuing the success of previous seminars, "One Day Seminar on Contract Management 2014" has been successfully held on 26 April 2014 with overwhelming responses received from the young members. Distinguished practitioners had been invited to share their experiences, address problems and explore new practices.

Thanks to all the efforts paid by the organizing committee, speakers and helpers, young members in various professions have gained useful insight in contract management from the talks and discussions. This success demonstrates the strength of the united effort of young professionals from different industries.

THE HONG KONG COALITION OF PROFESSIONAL SERVICES- THE YOUNG COALITION PROFESSIONAL GROUP

By Coordinator – Ir Venice HUNG Chun Leung

The Hong Kong Coalition of Professional Services (HKCPS), founded in November 2001, is a non-profit seeking organization to promote the common interests of Hong Kong professionals, and to promote and gain professionals to the social and economic development of Hong Kong.

The Young Coalition Professional Group (YCPG) under HKCPS was formed in 2012 to strengthen connection with all professionals.

YMC represents the HKIE in YCPG, which also includes young member groups of HKBA, HKDA, HKIA, HKICPA, HKICS, HKILA, HKIP, HKIS, HKMA, LSHK. The inauguration ceremony of YCPG was held on 3 August 2013.

Two networking drinks parties were held on 18 July 2013 and 11 April 2014 respectively. They both attracted around 400 participants to join and allowed different professionals to share their views and professional knowledge. Both parties had special themes – Let's Go "R" and Easter Bunnies so that participants could dress in fulfilling the themes to increase the air in the evenings.

Youth Forum cum Inauguration Ceremony of YCPG was held on 3 August 2013. One of the founders of HKCPS, HKSAR Chief Executive Mr CY Leung, was invited as Guest of Honour. The title of the forum was "Opportunities and Challenges of the Young Professionals". Young professionals had valuable chance to gain experiences from successful outstanding persons, like Mr Vincent Lo – the Chairman of Shui On Group, Dr Leong Chi Hung – the Specialist in Urology. Besides, they also had discussions between senior professionals on stage to share their views on the topic.

Upcoming event of YCPG will be Youth Forum 2014, which will be held in July. It is a good opportunity for young engineers to explore and express views on Notion of 2030 Hong Kong Ideal City. Do pay attention to YMC website for latest details about the event.

Young Engineers Programme with MI Division

By Coordinator - Ms Regina CHEUNG Yi Nga

Manufacturing and Industrial Engineering (MIE) is one of the pillars of the growing economy of China and it also plays an important role in our society by facilitating the transportation and supporting utilities and public services.

To assist students in understanding more about this board and diversified industry, Young Engineers Programme (YEP) has been held annually by the MI Division and YMC since 2002. Wide range of MIE applications/real practices in our society was demonstrated to the participants (Yeppers) through a series of activities such as seminars, local firm visits and a 2-day China Visit.

After the comprehensive training, Yeppers are formed into six teams and are required to share their point of view about "The Role of MIE in our future society" with a 15-minute presentation. Not only did the Yeppers had a deeper understanding on the different roles of MIE but YEP had also enabled them to interact with the experienced practicing engineers. As we close off another successful year with YEP, we look forward in providing our student members with opportunities to get involved with this meaningful programme in the future.

Date	Event	Speaker	Organizers	Group
30/07/2013	「4.20 蕨山地震災後視察」分享會	Ir Dr the Hon WK Lo	HKIE-YMC	SG
