THE HONG KONG INSTITUTION OF ENGINEERS
YOUNG MEMBERS COMMITTEE

THE 33rd ANNUAL GENERAL MEETING
For
SESSION 2017/2018

Date : 6 June 2018 (Wednesday)
Time : 18:30
Venue : Grand Ballroom, 6/F, Royal Plaza Hotel, 193 Prince Edward
Road West, Mong Kok, Hong Kong

AGENDA ITEM

1. To receive and confirm the Minutes of the 32nd Annual General Meeting.
2. To receive and adopt the Annual Report of the YMC for Session 2017/2018.
3. To receive and adopt the Financial Statement of the YMC for Session 2017/2018.
4. To elect the Chairman and Committee Members of the YMC for Session 2018/2019.
5. Any other business.

THE HONG KONG INSTITUTION OF ENGINEERS
YOUNG MEMBERS COMMITTEE

Minutes of the 32nd Annual General Meeting
for the Session 2016/2017

Date : 6 June 2017 (Tuesday)
Time : 18:55 to 19:25
Venue : The Grand Assembly Hall, 4/F North Tower, "The Salisbury" – YMCA of
Hong Kong, 41 Salisbury Road, Tsimshatsui, Kowloon, Hong Kong
Present : More than 50 members attended

The Chairman welcomed all participants to the Thirty-second Annual General Meeting of the Young Members Committee (YMC).

1. The minutes of the Thirty-first Annual General Meeting was confirmed and endorsed.
Proposer: Ms Lee Man WONG Seconder: Mr Eric HO
2. The Chairman delivered the Annual Report for the session 2016/2017, which was subsequently endorsed.
Proposer: Mr Logan CHAN Seconder: Ir Annie CHAN
3. The Treasurer presented the Financial Report for the session 2016/2017, which was subsequently endorsed.
Proposer: Ir Alan CHENG Seconder: Ms Yani KO
4. Ir Ambrose CHEN Hao-ting was nominated by the Committee to be the Chairman for the session 2017/2018 and was subsequently elected without objection.
Proposer: Ir Vincent LEUNG Seconder: Ir Ryan CHAK

5. The following members were nominated in the election of Committee Members for the session 2017/2018.

Name	Discipline	Organisation
Ms Kahl CHEUNG Kar Man (Proposer : Ir Ambrose CHEN)	Mechanical Seconder : Ms Emily YU)	(n/a)
Ms HO Ka Man (Proposer : Ms Candy FUNG)	Electronics Seconder : Ir Vincent LEUNG)	MTR Corporation Limited
Mr Alan LAM Ho Lun (Proposer : Ir Ambrose CHEN)	Civil Seconder : Ir TANG Whai Tak)	Atkins China Ltd.
Ir Raymond MAK Ka Yeung (Proposer : Ir Ambrose CHEN)	Civil Seconder : Ms Emily YU)	Wings & Associates Consulting Engineers Ltd.
Mr Samson PUNG Chun Nok (Proposer : Ms Candy FUNG)	Civil Seconder : Mr Logan CHAN)	AECOM
Ms Hidy YAN Tsz Tung (Proposer : Ir Ambrose CHEN)	Mechanical Seconder : Ir TANG Whai Tak)	WSP Parsons Brinckerhoff
Ms June YIP King Yan (Proposer : Ir Ambrose CHEN)	Building Services Seconder : Ir Kenneth CHEUNG)	Architectural Services Department, HKSAR Government

Total No. of Nomination: 7

No. of Vacancy of Committee Members for Session 2017/18: 5

As the number of nominations for Committee Members exceeded the number of vacancies, a ballot was held. Ir Annie CHAN and Ir Ryan CHAK, Past Chairmen of YMC, were appointed as Scrutineers for the vote counting.

After voting, the following candidates were declared duly elected to be Committee Members of the YMC:-

Ms Kahl CHEUNG Kar Man
Mr Alan LAM Ho Lun
Mr Samson PUNG Chun Nok
Ms Hidy YAN Tsz Tung
Ms June YIP King Yan

6. A.O.B

The Chairman expressed sincere gratitude for the support and contribution of all committee members and helpers in the Session.

Ir Ambrose CHEN proposed a vote of thanks for the outgoing Chairman, Ms Candy FUNG, for her leadership in the Session.

There being no other business, the meeting adjourned at 19:25.

Recorded by:

Ms Emily Hay Ting YU
Honorary Secretary (2016/2017)
Young Members Committee
The Hong Kong Institution of Engineers

Chairman's Message

"The idea was to bring together a group of remarkable people, to see if they could become something more."

- Nick Fury (Avengers)

It is yet another fruitful session for the Hong Kong Institution of Engineers - Young Members Committee (HKIE-YMC), coming to its 33rd year. Earlier in the session, I set the theme of this session as "Redefine", hoping to reshape the HKIE-YMC into a more creative, professional and outgoing branch of the HKIE to embrace the rising challenges both inside and outside the industry.

This year also marks an important milestone for the engineering industry of Hong Kong, as it is the 70th anniversary since the establishment of the Engineering Society of Hong Kong, the predecessor of the now HKIE. Not only did it aim to set out the professional image of engineers in Hong Kong then and now, but also to uphold the tradition of a high standard of professionalism and to provide a platform for the exchange of technical knowledge and cutting edge technologies. The society's efforts to nurture our young engineers continue to this day, as the HKIE-YMC continues looking forward by "Engineering a New Horizon from 70 Years' Foundation", as set out by this year's theme of the HKIE. The HKIE-YMC has upheld this theme and discovered many new horizons throughout the session. Our Committee continued to provide high-quality activities for our Registered Young Members (RYM) from all 21

disciplines of the HKIE, and with the support of around 5,000 RYMs, we maintained one of the most prominent bodies for young engineers in Hong Kong.

The HKIE-YMC continues to provide technical seminars / visits covering a wide spectrum of engineering disciplines. From the selection of cooling towers, Waste Electrical and Electronic Equipment Treatment and Recycling Facility (WEEETRF), drone safety to CLP Academy, our events provides our RYMs the opportunity to refine themselves into professional engineers with a wider range of engineering knowledge at hand. In addition, we also organised several activities aimed at the all-round development of our RYMs, including geopark visit, photography workshop X heritage tour, etc. to help our RYMs appreciate aspects other than engineering such as arts, culture, and so on.

In this session, we have taken the initiative to become more exposed in the industry. In addition to our collaboration with other divisions of the HKIE to organise themed activities, we have taken a big step outward in collaborating activities with the young groups of other professionals such as architects, planners, lawyers, etc. The architecture walk, one day seminar on contract management and the upcoming planning workshop for the Yau Ma Tei Fruit Market development would surely bring to our RYMs

a whole new experience and perspective in working with other professionals in the construction industry. Moreover, we have been stepping outside Hong Kong. Further to our flagship event "Overseas Delegation to New York", from which our delegates had gained diverse technical experiences and learnings from engineers in New York, our participation in the Conference of ASEAN Federation of Engineering Organisation had exposed HKIE-YMC to the engineering sector of Southeast Asia, and we are now establishing a platform for young engineers in the Asia-Pacific region to enable exchange of innovative ideas and engineering technologies and to work together for a better world.

In order to work for a better world, the HKIE-YMC has continued to commit to community services and contributes to the local society. In addition to our collaboration with various NGOs in organising activities and mentorship schemes, we have assisted HKIE in organising the "Smart Tomorrow, Engineers' Motto" event, which allowed us to engage the public and to raise public awareness towards the

engineering industry. We also re-booted the "Dialogue with the Secretary" series, just at the right timing of the change of government in July 2017, which allows our RYMs to talk to the Secretaries of Bureaux and to share their views on policies and voice out the views of the young.

With the great effort of all helpers, coopted members, event coordinators, observers and committee members, HKIE-YMC has surely become something more after this session. I would like to express my heartfelt thanks to them for their great contribution to make this session of the HKIE-YMC another success. Also a special thanks to Advisor Ir Dr. PL Yuen, Coopted Members from Council Ir Dr. Joseph Chi and Ir Jovian CHEUNG, in which they have spent generous amounts of time and effort in giving guidance to the HKIE-YMC to become a better organisation under the HKIE. It has been an honour serving the HKIE-YMC. After this session, I am sure the HKIE-YMC is well prepared to face the more difficult challenges up ahead, and *"boldly go where no one has gone before."* - Star Trek.

Highlights for 2017/18

Overseas Delegation 2018 to New York – The Future of Global Cities

Ir TANG Whai Tak

Hong Kong prides itself as “Asia’s World City”; what exactly does it mean? What do we have in common with our global cities? How do we better prepare our city for the future? With a view to inspire our future leaders in shaping the city, the YMC has planned this study mission to investigate the meaning of global cities, reflect upon the success, tap into the worldwide challenges and examine the formulation of solutions by other major cities on how to “future-proof” our city.

This year, the HKIE-YMC and the Continuing Professional Development Committee jointly organised a delegation from 30 March to 7 April 2018. We were honoured to have 6 distinguished advisors including the President to provide valuable advice. One of the advisors, Ir Dr Otto Poon, joined the study trip with 16 young engineers from a good mix of engineering backgrounds.

“Nylonkong” (New York -London-Hong Kong) share the fame as the most remarkable cities in the 21st century and, therefore, we turn to New York as our destination of this year’s delegation in search of our answers.

Against the main theme of “The Future of Global Cities”, three sub-themes were established covering “Resilience”, “Innovation” and “Security”. To facilitate the in-depth research, the delegates began by reviewing the current status in Hong Kong under each of the aspects. A series of 10 local seminars and visits were organised, which were open to all HKIE members and over 300 members attended.

New York is a suitable destination for this comparative study as it shows similarities with Hong Kong in aspects including geographic, population size, and economic development for drawing meaningful comparisons and facilitating sound exchange of experiences with our counterparts. New York is under continuous development through its reinvention of public space and enhancement of public facilities. Many of its directions echo Hong Kong’s 2030+ plan and the Smart City Blueprint for Hong Kong. In particular, we set out to study how the public are engaged in the decision-making process to shed light on how projects in Hong Kong can gain popular support and be delivered more smoothly as we anticipate an increasing demand for public participation.

We completed 15 technical visits in New York, covering representative organisations of the state, market and the civil society. We visited governments of different levels including the United Nations, departments of the New York City and under the Mayor’s Office to discuss various policies and the state’s role. In the private sector, we visited Autodesk that developed cutting-edge organic building material and generative design approach combining virtual reality and artificial intelligence. We also witnessed the construction of the 3.1-mile cable-stayed New York Bridge with state-of-the-art sensors system. Furthermore, we met with teams from Bank of America headquarters and Nomura Holding America Inc. in learning their facilities in-built resiliency against natural hazards as well as cyber-attacks.

More interestingly, we obtained insights into the maturity of the civil society in the United States by studying the success of the society-led projects including the Rebuild by Design that gathers global experts in rebuilding New York at the aftermath of Hurricane Sandy, and the High Line that revitalised a neighbourhood by creating a park on a neglected elevated railway.

To foster international relationships, we also fulfilled our duties of representing the HKIE

in meeting on separate occasions with students of the Tendon School of Engineering at NYU, members of the American Society of Civil Engineers and the US Green Building Council to exchange our views on how young engineers can join hands in combating a range of global challenges.

The research team is tasked to publish a research report and organise a debriefing session to share their findings in late June 2018 with members of the HKIE.

BGCA Child Development Project - Growing Partners

Ms. Rachel NG and Ms. Evelyn WAI

Since 2010, the HKIE-YMC has been partnering with The Boys' & Girls' Club Association of Hong Kong (BGCA) for their Mentor (Blues) Buddy System in the Growing Partners Project. 17 young engineers were recruited through the HKIE-YMC in this Session to become mentors of the Project. Each of the mentors was paired up with at least one mentee to provide assistance in setting up their Personal Development Plans by participating in various workshops and events with their mentees that aided their personal development. In this mentorship scheme, the mentors had helped to promote the engineering industry to their mentees,

developing the mentees' interest in the engineering profession. This Session had marked a strong start of the "HKIE-YMC Mentorship Scheme (2017-2019)". With the active participation of our mentors, the HKIE-YMC will continue to support this Project in the following two years of the Scheme and to further collaborate with the BGCA and the mentors by arranging more engineering related events for the mentees. We hope that our participation in this Project will continue to inspire more youngsters of becoming future engineers and assist our mentors in developing stronger bonds with their mentees.

CAFEO 35 / YEAFEO 24 in Bangkok, Thailand

Ms. Emily YU

The 35th Conference of the Association of Southeast Asian Nations (ASEAN) Federation of Engineering Organizations (CAFEO 35) in conjunction with the 24th Meeting of Young Engineers of ASEAN Federation of Engineering Organizations (YEAFEO 24) is the highlighted annual event of the ASEAN Federation of Engineering Organization (AFEO).

CAFEO has been held annually at the different member countries since 1982 and attracts hundreds of foreign and local engineering professionals. CAFEO 35 was held in Bangkok, Thailand from 16 to 18 November 2017, with the theme “Towards a Sufficiency Economy: pathways to sustainable development”. This year, six delegates represented Hong Kong and the HKIE-YMC.

One major function of the conference was the meeting of different working groups, including the YEAFEO Board Meeting. YEAFEO represents the young engineers of the national engineering organizations under AFEO, its mission is to be a dynamic and progressive organization that leads to the development of young engineers. The YEAFEO representatives from each ASEAN country and representatives from participating guest regions of Japan, Taiwan, and Hong Kong were given the opportunity to present their regional report, introducing their respective engineering organizations and sharing on the activities of the young sector. The six YMC delegates were pleased to learn more of the engineering organizations in the ASEAN regions. In particular, the host country, Thailand, had spent considerable effort in reaching out to

the community by hosting a weekly radio show called “Engineering Clinic” that broadcast the knowledge on home construction. They continued to bridge the experienced engineers with the future leaders in the profession through the “Seniors meet Youngs” series. Winners of the top student prizes would have the privilege to receive their awards from the King of Thailand, demonstrating that the engineering profession is highly valued by the monarch.

Having joined the CAFEO/YEAFEO in previous years, Honorary Secretary Ms. Emily YU was delighted to find that “the number of young members and their respective institutions have continued to grow, and the influence from other countries is very clear. During the country reports, members would report that they had new initiatives due to the inspiration from other countries.”

The delegates then joined the site visit to Grand Rama 9, a new CBD in Bangkok with total 1.2 million m² construction area which will be developed as a new neighbourhood to include luxury residential buildings, shopping arcades, offices, conference center and hotel, featuring the G Tower and the Super Tower. The engineers shared about the major challenges in designing these two structures, such as the irregularly shaped structure of the G Tower and the wind load that would need to be sustained by the super high rise Super Tower which would be 615m high, a remarkable 131m taller than the Hong Kong International Commercial Center.

The delegates also attended the technical

seminars of the conference, with topics related to Transportation and Logistics, Green Technologies, Sustainable Cities and Infrastructure, and Disaster Preparedness, Mitigation and Management, allowing the delegates to gain new technical knowledge and insights.

Through social dinners and networking events organized by local engineers, we tasted Thailand's diverse and delicious food. It was a great opportunity for us to meet new friends and chat after each day of hard work. Ms. Hidy Yan, Committee Member: “During my stay in Bangkok, I was amazed by the vitality of the city and the exclusivity of the Thai culture as much as with the strong passion and hospitality from the YEAFEO delegates. It had been a valuable opportunity that we shared our working experiences and the social engagement in different parts of the world.”

At the closing ceremony, the flag was handed over to the chairman and host country of CAFEO 36, Singapore. Delegates from different countries had the opportunity to give a performance representing their own culture. The Hong Kong delegates gave a singing performance of Hong Kong pop songs and took this opportunity to send our warmest regards to CAFEO, YEAFEO and all the participants. Sharing on his experience

of the conference, Mr. Thomas LAM found the closing ceremony the most unforgettable: “I was excited to see that engineers from different countries came on the stage during our performance to share the joy with us even though we had cultural differences.”

Each delegate had unique takeaways from the delegation. Deputy Chairman Ir Tak TANG “was delighted to work with our counterparts who were passionate about enhancing the sustainable development of their countries.” Committee Member Mr. King CHEUNG thought that “as we are in the similar age and background, it is easy for [the YEAFEO delegates] to get close and build up friendship fast in just a few days.” Registered Young Member Mr. Stanley Lai highly recommends other young engineers to join this type of delegation: “...the delegation not only extended my engineering experience to South-east Asian regions, but also made me understand the importance of intellectual and global horizons.”

We encourage young engineers to join us next year to learn about the engineering developments of the ASEAN countries, to network with fellow engineers, and to promote the HKIE and Hong Kong.

One Day Seminar on Contract Management

Ir TANG Whai Tak, Ms. Rachel NG, and Ms. Evelyn WAI

The One Day Seminar Organising Committee (ODSOC) links up five young professional groups including the Chartered Institute of Arbitrators (CI Arb), the Chartered Institution of Building Services Engineers (CIBSE), the Institution of Civil Engineers (ICE), the Hong Kong Institution of Surveyors (HKIS) and the HKIE. The ODSOC had been organising different activities for young members from the five institutions since its establishment in 2004. Several events, including social gatherings, community services and seminars, were organised by the ODSOC to enhance the relationship among these peer institutions.

The signature event, “One Day Seminar on Contract Management,” has been held for 15 years. It attracts more than 250 young members from the above mentioned institutions every year.

Continuing with the achievements made from previous years, “One Day Seminar on Contract Management 2018” was successfully held on 5 May 2018 at the Christian Family Service Centre in Kwun Tong. Distinguished practitioners were invited to share their experiences, including how they addressed contract issues, the common practices and the observed changes on contract management in Hong Kong. The event received overwhelming responses from the institutions.

As the chair of the organising committee this year, the HKIE-YMC would like to thank the organising committee, speakers and helpers for the efforts they have paid on the event. The young members from various professions gained insights on contract management from the talks and discussions. This collaborative success demonstrated the strength of the united efforts contributed by young professionals from different industries.

Working Group Reports

Students Promotion Group

Mr. King CHEUNG and Mr. Thomas LAM

From year to year, the Students Promotion Group (SPG) has always maintained a close bond with the HKIE Student Chapters (SCs), aiming to cultivate a new generation of engineers among the tertiary education sector for our Hong Kong.

To provide a good opportunity for their development, SPG organized the two-day-one-night Leadership Training Camp. The camp was prepared using experiential learning method, where we provided activities to let the participants discover themselves, discover the different characters among different individuals and the team dynamics formed between them. With the theme of “Enlighten your Path”, the participants could experience the life of an engineer’s career through difference activities. An evaluation session was provided for them to discuss about their observations and cohesion among different team formation. They learned and applied, breaking through their limits with

the support of their teammates.

One of the roles of SPG is to link with the SCs by providing support and advice in organizing various activities. During this session, SPG kept a close relationship with students in order to understand their needs and to help them in their career development as well as personal development. SPG assist the SCs to link the industry to students. The Engineers’ Night was successfully held in March, where students formed friendships with young engineers at this wonderful night and also gained better understanding about our profession. The SPG will continue to act as the bridge between YMC and student members, to broaden students’ horizons in the engineering profession and to enhance their sense of belonging in the HKIE.

Graduates Promotion Group

Ms. Lee-man WONG

The Graduates Promotion Group (GPG) provides a platform for all young members to equip themselves and prepare to become a professional engineer.

By organising the “Young or Ready Series” workshops, we aimed to provide first-hand information from the experienced assessors and to give insights to graduates on how to make a professional assessment successful. We were honoured to have support from the Environmental, Civil, Building Services, IT, Electronics, Biomedical, Electrical and the Mechanical, Marine, Naval Architecture & Chemical Divisions to jointly organise these workshops.

On the other hand, soft skills training enables an all-round development of a young engineers’

core competences for the application of technical knowledge. In this regard, workshops on professional writing, interview skills, and public speaking skills were organised. This year, a Mock Interview Session was also organised for members to experience how the interview session was carried out in actual scenario, where experienced assessors mentioned do’s and don’ts in the professional assessment.

Last but not least, GPG would like to express sincere appreciation to all the speakers, helpers and participants for your support throughout the session - the above events would not be so successful without your unfailing support. We hope the activities are useful in developing your competence for your route to become a professional engineer!

Seminars Group

Ms. Yani KO and Ir Raymond MAK

One of the definitions of the term “Engineer” is “the person whose job is using scientific principles to design or develop structures, machines, systems...etc. so as to enhance the quality of life of the citizens”. By all means, knowledge of scientific principles is essential for engineers to support their works. In this year, Seminars Group (SG) not only served our members talks and sharing in a broad range of technical topics, but also, following this year’s theme “Redefine” to look for seminar topics that could provide professional development, connect to the society, present the uniqueness of local engineering industry and pursue the trend.

In this 21st Century, the Electronic and Information Technology industries have expanded rapidly in the whole world. Not only mobile connectivity, but also the intelligence in the hardware and software have been rapidly developing. This year we have found various professionals in the industry to share the application of electronic and information technology in their products or work scopes; for example, mobile applications to enhance construction safety, development in AI and big data.

Besides new technology application, we appreciated the current practice in the local industries like introduction of cooling tower design, green motoring, development of local codes of practices, trends of material engineering, etc., thus allowing our young members to gain new insights.

Rapid development may, however, cause serious drawbacks to the society, such as health and ecological problems. Sustainability is certainly considerable in enhancing citizen’s quality of life. It was our honour to have Mr. CY LAM, the former Director of HK Observatory, to share his new definition of sustainable development and his current mission in reviving local villages. Indeed, we were grateful to have various professionals share on the waste treatment technology and the review of environmental impacts in HK.

For young engineers, career development concerns them a lot especially because many infrastructure projects in HK are nearing completion. We have searched for the potential industries like quality management auditing, works related to MBIS/MWIS, aged building revival, etc. to let young members prepare and equip themselves for new opportunities.

Visits Group

Mr. Timothy LUN and Ms. Nikita CHAN

Through the years, the Visits Group (VG) has been dedicated to widening our members’ visions by stepping out from the lecture room and office, and bringing them to gain knowledge through organising technical visits events. We explore different engineering marvel projects across all regions in Hong Kong, allowing our participants to obtain the first-hand experience at the scene, and also the most updated information of our industry’s development.

This year, our visits covered sites and spots which involved diverse engineering disciplines. We paid a visit to historical sites with heritage, like the Old Tai Po Police station which is now the Green Hub after revitalization, and The Murray Hotel, which was converted from ex-Murray Building Government Office. We

travelled to industrial plants, such as the CLP Power Stations, HAECO’s aircraft hangar, and Chemical Waste Treatment Centre (CWTC). Moreover, we also visited different treatment works and facilities, like the T . PARK, Waste Electrical and Electronic Equipment Treatment & Recycling Facility (WEEETRF), DSD Happy Valley Underground Stormwater Storage Scheme etc. All technical visits were actively participated by our members.

It has been a fruitful year, and it cannot be achieved without the generous support from all the host companies, organisations and parties, fellow VG helpers, and, of course, our members. We would like to extend our sincere gratitude, and we will keep up and continue to organise more inspiring events for our members!

Non-technical Programme Group

Ms. June YIP

To facilitate all-round development of our young members, the Non-technical Programme Group (NPG) provides activities on general professional matters and professions other than engineering.

Engineers learn managerial aspects in different ways. NPG has organized a seminar on Financial Management, to share with our members some basic knowledge on financial planning and management. Through the Tips for Smart Dining Out, we hope our members could arm themselves with new healthy diet concept “My plate” to achieve balanced diet and nutrition easier.

Self-improvement and personal development helps in enhancing personality traits of young engineers. A workshop on Critical thinking was arranged for developing a habit of effective thinking to our young engineers. Continuous

learning helps to successfully adapt to changing work and life demands. A four-lesson Putonghua course was therefore organized for developing the proficiency in Putonghua of young engineers, which would help them to grasp every opportunity in daily life. To promote the message of proper tree care in engineering field, a seminar on tree management was arranged for members to understand our trees from planting to maintenance.

It was a fruitful year for NPG not only because of the overwhelming responses and positive feedback received, but also because many members have expressed their interest and enjoyment through joining our activities. Finally, I would like to express my sincere appreciation to my beloved helpers for all your support throughout the session. I look forward to seeing you again in future events!

Community Services Group

Mr. Eric HO

In this Session, the Community Services Group (CSG) continued to provide a variety of meaningful activities, trainings and voluntary work for our young members to have a good opportunity to contribute to the community.

As we wished our members to help the people in need effectively, workshops on sign language were organised to equip our volunteers. The workshops allowed members to gain experience in effective communication skills with those who are hearing-impaired.

The increasing elderly population is a concern in Hong Kong and more and more care should be devoted to them. The CSG joined several volunteer programmes with the Yang Memorial Methodist Social Service Centre to visit the elderly during Mid-Autumn and Tuen Ng Festivals. We also sent Fortune Bags with our festival greetings to singleton elderly who lived on their own in the Choi Hung area.

To enhance the living and study conditions of students under poverty, we joined St. James' Settlement in the Brighten Children's Home Project. Our volunteers fully devoted themselves in the 3-day programme through design, procurement, and installation of some small furniture. Moreover, the YMC formed teams to participate in the “Sowers Action Challenging 12 Hours 2017” in order to help students in China to alleviate poverty by education through raising charity funds.

Finally, we would like to thank all the helpers for their kind support and contribution to the CSG. We will continue to organise more meaningful and interesting events for our young engineers to learn, to have fun and most importantly, to contribute to our society.

Public Relations Group

Ms. Hidy YAN

Public Relations Group (PRG) has continued to strengthen our well-established bonding with other professional organisations by organising different types of activities including workshop, seminar and social networking events.

Jointly organized with HKIA and HKIS, PRG started our fruitful session with a joint professional architectural walk in Tsim Sha Tsui and West Kowloon District. Our participants learned to appreciate our home city in the tour to the latest modern residential and cultural development around us. Besides, the one-day workshop “HKIE YMC x HKCA YMS Pro - NEC for Future Leaders” allowed our members to understand the system and implementation of the New Engineering Contract 4. It is worth to note that apart from the system itself, people were the crucial factor in the accomplishment of NEC.

The session continued with our annual flagship event - Joint Society Party 2017, which was jointly organised by the HKIE-YMC and seven other engineering societies. With the

theme “Casino Night”, over 140 members from different societies enjoyed the fun night with games, lucky draws, and saxophone performances from Ir Dr Hon LO Wai Kwok.

The blast was followed by a series of joint activities, including joint institution workshops, networking gatherings and company visits. The workshops enabled our young members to learn interpersonal and business communication skills, use of technology and relationship development from case studies sharing and role plays led by experienced Public Relations professionals.

Public Relations are more than media relations; it is about public engagement and collaboration between different elements, e.g. technologies, cultures, economy ... etc. and most importantly - the people. It is believed that with the coalition from all young engineers and professionals, PRG would become a more lively and friendly environment to continue providing our members an excellent platform to extend their network and broaden their views.

Sports and Recreation Group

Mr. Samson PUNG

To promote members' interests in the Institution and fellowship amongst all classes of members, through:

- Organizing various interest classes, to expose members to different activities outside of engineering;
- Promoting a balanced lifestyle by including sports and recreational activities;
- Networking among young members and other classes of members;

Ecotour to Geopark

Over 25 Registered Young Members visited Sai Kung. We were lucky to have Mr. Erik MAK Ka-wai as the Recommended Geopark Guides (R2G) throughout the tour on 25 November 2017. During the boat tour, members understood more about the formation of hexagonal rock columns and the historical information on the nearby areas.

Construction Industry Sports Day

As one of the annual events of the Construction Industry Council, HKIE-YMC formed teams to participate the games on 5 November 2017. Mr. Henry CHAU won the gold medal in the 400m race with a time of 1:00:63. Team YMC also won medals in the 500m rowing race and was a finalist for the team games.

Green Carnival 2018

YMC provided the technical support for the 17th Creative Eco-Model Tournament during the 15th Green Carnival held by the Green Council, making for an enjoyable day for over 4,500 teachers, students and public participants in Kowloon Park Piazza on 4 February 2018. Unlike previous years, students designed their own balloon-powered cart to compete in the tournament, maximizing students' creativity and enhancing their technical knowledge.

Social, Culture and Arts Group

Ms. Fanny YEUNG

Social, Culture and Arts Group (SCAG) aims to promote local culture and cultivate the sense of art among registered young members. Similar to previous years, we organized different types of activities for our members, including Coffee Brewing Workshop, Heritage Tour and Photo-taking Workshop.

This year, we focused more in conservation and appreciation of historic places in our community. “Exploring Hong Kong Island by Tram” gave our members an insight into the island side’s unique past and unbelievable contrast to the city of today, especially along the Wan Chai and Central districts. Hong Kong is a fast-paced city. This tour also gave a chance for participants to spare a few hours with slower pace in understanding our community.

but photos do not. In this activity, members learned about the diverse historical and cultural background of the PMQ and its historical spots led by PMQ’s docent. Members captured the buildings and architecture from unique perspectives and angles with their mobile phones and cameras.

Apart from cultural tours, Coffee Brewing Workshop was an interesting class for our members. This workshop introduced specialty coffee and the foundations of sensory, non-espreso brewing methods such as the Hario V60 and Aeropress. Members had the chance to brew their own cup of coffee and receive a sampled of coffee beans to try coffee brewing at home.

Lastly, SCAG would like to express our sincere gratitude and appreciation to all helpers and members for your support during the Session 2017/18. We will continue to organise more interesting and meaningful events in the coming future.

“Capturing History with Photographer’s Eye” was Heritage Tour which crossed over with a Photography Workshop. History fades,

Social Affairs Group

Mr. Thomas LAM

The Social Affairs Group (SAG) was established to keep young engineers abreast of current affairs and social challenges. In this session, we organized a series of forums for young engineers to exchange views with the government officials on the concerned topics.

The forums covered the current hot topics in Hong Kong. In October 2017, we were delighted to have Mr WONG Kam Sing, GBS, JP, Secretary for the Environment to discuss with our young engineers on the way forward to make Hong Kong a more livable city. In March 2018, we invited Mr LAI Tung Kwok, GBS, IDSM, JP, Former Secretary for Security to talk about the latest cyber threats and cyber security development in Hong Kong. Both forums

received enthusiastic responses from our young engineers with great attendance and active participation during the discussion sessions. In June 2018, we welcome Ir CHAN Fan, JP, Secretary for Transport and Housing to share his view on the urban challenges in Hong Kong.

We hope the forums have raised the awareness of young engineers on social affairs and provided opportunities for them to voice out their opinions on the government policies. Last but not least, we would like to take this opportunity to express our sincere gratitude and thanks to the government officials, our helpers and young members for all your support on our forums.

Human Resources Group

Mr. Alan LAM

In this 2017/18 session, Human Resources Group (HRG) continues to provide support on the human resources affairs within the HKIE YMC, connecting with young members who would like to join our big family as helpers. HRG has also been focusing more on the relationship and connection enhancement among committees, helpers and young members in this session.

At the beginning of the session, HRG launched the “HKIE-YMC Helpers’ Orientation and Reunion Day 2017” to introduce the new session of HKIE-YMC to the new young members and experienced YMC helpers, and to recruit some enthusiastic young members to become new YMC helpers. Over 50 participants including our committees came together and had an enjoyable afternoon with catering and games.

To strengthen the relationship and teamwork

within the committee, HRG organized numerous internal events, such as monthly dinner gatherings and birthday parties, while the ‘Cooking X Christmas Party’ was another special highlight of the year. All the committees demonstrated their cooking talent with style and completed all the planned cuisine, from western to Japanese, with great teamwork. Well done, everyone!

Furthermore, HRG organized another two teamwork workshops, Cake Baking Class and Rock Climbing Class, and invited both our committees and helpers to participate and achieve the planned targets together in small teams.

Lastly, I would like to thank all my helpers, committees and participants for your support throughout the session. I am looking forward to having you again in the future events and to achieve more goals together.

Publicity and Webmaster Group

Ir Vincent LEUNG

Publicity and Webmaster Group (PWG) aims to keep our Registered Young Members updated on HKIE-YMC’s latest development by broadcasting and promoting the activities organized by and supported by HKIE-YMC through different channels.

In this session, HKIE-YMC organized over a hundred events including seminars, visits, workshops and delegation for our young members. Members can easily access our latest updates through publications on the HKIE eNewsletters system, the “Hong Kong Engineer” (HKIE Journal), online pinkpage and the HKIE Mobile Apps. The HKIE Mobile App named “HKIE Application” is free to download which is a convenient way to access to details of events organized by HKIE-YMC and other HKIE divisions/committees. You can even simply click a button to synchronise your interested event into your calendar!

One of our major communication platforms, HKIE-YMC Homepage (<http://ymc.hkie.org.hk/>), provides updated news and latest event details to our young members. Members can easily register for any interested HKIE-YMC events through our online enrollment function.

This year, in addition to the HKIE-YMC Facebook page, we have also set up an Instagram page (@hkieymc) to enhance our communication with our members. Don’t forget to follow us and give us a “LIKE” or leave us feedback on our Facebook and Instagram pages! We always appreciate your comments for us to strive for excellent service.

The Outstanding Helper Awards are awarded to helpers who have made significant contributions to the HKIE-YMC throughout the Session. A certificate of appreciation will be presented during the Annual Dinner of HKIE-YMC.

The Best Reporter Awards are awarded to Young Members who had exceptional reporting skills in selected activities of the HKIE-YMC. The winning reports were handpicked by the Speakers, which were published in the HKIE journal "Hong Kong Engineer". The winners would also receive a cash prize. The prize presentation ceremony will be held at the HKIE-YMC Annual Dinner.

Activity List 2017/18

Date	Event	Co-organise	Speaker
24-Jun-2017	Technical Visit to M+ Museum	-	-
29-Jun-2017	與國家航天員對話- 香港建造及工程界青年專業人士交流晚會	HKILA, HKIA, HKIP, HKIS, AES, ProHK, LEAPS	景海鵬少將, 陳冬上校
30-Jun-2017	Joint Professional Networking Drink	YCPG	-
10-Jul-2017	Green Transportation Logistics in Horizon – 2020	LTD	Mr. David YAM, Ms. Helen LEUNG Chui Ting
19-Jul-2017	Seeking Architecture in Landscape Photography	MMNC	Mr. Tugo CHENG
29-Jul-2017	Technical Visit to CUHK Jockey Club Minimally Invasive Surgical Skills Centre	-	-
11-Aug-2017	Technical Seminar: Mobile Apps for Construction Safety and Quality Management	CAD, AMC	Mr. Stephen AU
19-Aug-2017	Technical Visit to CLP Black Point Power Station and Castle Peak Power Station	-	-
1-Sep-2017	Technical Seminar on "Smart Analytical Optimization Tools for Building Management System"	CAD, AMC	Ir Timothy LEE
13-Sep-2017	Young or Ready Series: A Route to become a Professional Environmental	-	Ir Prof. C F LAM
14-Sep-2017	Technical Seminar w: Infrastructure to Support Wider Adoption of Green Motoring in Hong Kong	-	Mr. Edmond CHAN
20-Sep-2017	Technical Seminar: Minimally Invasive Surgical (MIS) Technologies	-	Prof. Zheng LI
23-Sep-2017	Technical Visit to Green Hub (Revitalization of the Old Tai Po Police Station)	-	-
23-Sep-2017	Elderly Home Visit – Mid-Autumn Festival	Yang Memorial Methodist Social Service	-
26-Sep-2017	Joint Professional Event: Mooncake Making Class	CIARB - YMG, CIBSE-YEN, HKIS-YSG, ICE-HKA-G&S	-
28-Sep-2017	Young or Ready Series: A Route to become a Professional Civil Engineer	CVD	Ir Ian S P CHUNG
29-Sep-2017	Seminar on "To Create A Smarter World- to know more on Seeing Eye Dog"	CAD, EVD, AMC	Mr. Raymond CHEUNG
7-Oct-2017	Brighten Children's Home project	St. James' Settlement	-
7-Oct-2017	Coffee Brewing Workshop	-	-
14-Oct-2017	Technical Visit to Hong Kong Aircraft Engineering Company Limited (HAECO)	-	-
16-Oct-2017	Dialogue with the Secretary for the Environment	-	Mr. WONG Kam Sing, GBS, JP
17-Oct-2017	Technical Seminar: Design and Operation of Waste Electrical and Electronic Equipment (WEEE) Treatment Facility	-	Mr. Nigel MATTRIVERS
22-Oct-2017	Sowers Action Challenging 12 Hours 2017 – Team YMC	Sowers Action	-

Date	Event	Co-organise	Speaker
26-Oct-2017	Technical Seminar: Impact of Regional Transboundary PM 2.5 Pollution on Hong Kong: Application of Source Tagging Method	EVD	Ir Dr. Alex GBAGUIDI
29-Oct-2017	HKIE-YMC Helpers' Orientation and Reunion Day 2017	-	-
30-Oct-2017	Technical Seminar: Reviving Remote Villages – Why and How?	EVD, AMC	Mr. LAM Chiu Ying
4-Nov-2017	Joint Professional Architectural Tour Walk (Tsim Sha Tsui District)	HKIA-YMC, HKIS-YSG	-
4-Nov-2017	Technical Visit to North East New Territories (NENT) Landfill	-	-
5-Nov-2017	Construction Industry Sports Day cum Charity Fun Day 2017	CIC	-
13-Nov-2017	Technical Seminar: Design and Selection of Cooling Tower System and Water Tank System	EVD, AMC, CAD	Ms. Isa ZHANG
18-Nov-2017	NEC for Future Leaders	HKCA-YMs. Pro	Ir Dennis LI, Ir Lillian CHAN, Mr. Francis LEUNG, Mr. MAK Ka Wai, JP
20-Nov-2017	Workshop on Professional Writing - Essential Skills to become 'Ir'	CPDC	Ir Dr. FC Chan
25-Nov-2017	Ecotour to Geopark	CPDC	-
1-Dec-2017	Technical Seminar: Representative River Regeneration Project, the Hong Kong (Kai Tak River) and China Cases	EVD, AMC	Mr. Raymond WONG
9-Dec-2017	Technical Visit to Chemical Waste Treatment Centre (CWTC)	-	-
16-Dec-2017	Joint Professional Event: Barbecue Night	CIARB - YMG, CIBSE-YEN, HKIS-YSG, ICE-HKA-G&S	-
18-Dec-2017	Christmas Seminar-"A simple Rule of Thumb for Mall Engineer to sustain in Festival Peak"	-	Ir K F YEE, Ms. Yovian CHAN
6-Jan-2018	Technical Visit to Central Mail Centre (Kowloon Bay)	-	-
6 to 7-Jan-2018	Leadership Training Camp – Enlighten Your Path	CPDC	-
8, 15, 22, 29-Jan, 5, 12-Feb	Volunteering Skills Training- Sign Language Class	CPDC	-
10-Jan-2018	OD2018 Series: Technical Seminar on Smart City Blueprint for Hong Kong	CPDC	Mr. Albert WONG
16-Jan-2018	Understand our trees from planting to maintenance - How these matter in design and construction	-	Mr. Chiky C Y WONG
19-Jan-2018	Technical seminar on artificial intelligence - deep learning and its applications in different industries	-	Ir Dr. F C Chan
20-Jan-2018	Technical Visit to Waste Electrical and Electronic Equipment Treatment and Recycling Facility (WEEETRF)	-	-
20-Jan-2018	Heritage Tour - Explore Hong Kong Island by Tram	CPDC	-

Date	Event	Co-organise	Speaker
26-Jan-2018	Joint Society Party – Casino Night	AES-YES, ASHRAE-YMC, ICE, HKA G&S, IET-YMS, HKIPE, HKIPM-YMC, IMechE-YMS, ASCE	-
29-Jan-2018	Tips for Smart Dining Out 健康出外飲食策略	-	Ms. KO Tsz Yan
3-Feb-2018	OD2018 Series: Technical Visit to MindSphere Application Centre	CPDC	-
4-Feb-2018	Green Carnival 2018 and the 17th Creative Eco-Model Tournament	Green Council	-
9-Feb-2018	Technical Seminar: Drone Fever – Engineers, Are You Ready to Implement Drones in your Work?	-	Mr. Rickson CHOW
26-Feb-2018	講座：堪輿學與環境學 2018	AMC, EVD, CAD	黎曉日師傅
28-Feb-2018	OD2018 Series: Seminar on Cybersecurity Fortification Initiative	CPDC	Dr. Lucas HUI
28-Feb, 7, 14, 21-Mar-2018	工程普通話工作坊	CPDC	-
1-Mar-2018	Young or Ready Series: A Route to become a Professional Electronic / IT / Biomedical Engineer	END, ITD, BMD	Ir Dr. CHAN Chun-leung, Ir Dr. TSANG Kim-fung, Ir Stanley SIU, Ms. YEUNG Hiu Fan, Fanny
3-Mar-2018	Technical Visit to T. PARK	-	-
5-Mar-2018	Young or Ready Series: Mock Interview Workshop	ITD	Ir Dr. NG Chak-man, Ir Dr. Vincent NG To-yeec
6-Mar-2018	Workshop on Public Speaking	CPDC	Mr. Jetta CHAN
8-Mar-2018	OD2018 Series: Seminar on Eco-shoreline in Hong Kong	CPDC	Prof. Kenneth M Y LEUNG
